ECPA 2017 - The 11th European Conference on Precision Agriculture

It is 20 years since the first ECPA conference took place in the UK and now the organisers are pleased to welcome the return of the conference to the UK and in particular, to Edinburgh. The conference will continue with the successful format enjoyed in previous conferences, building in strong industry sessions and participation thus creating an ideal platform for your business or organisation to reach this captive audience of around 400 delegates through our programme of sponsorship and exhibitor options.

ECPA 2017 - The 11th European Conference on Precision Agriculture
With close to 400 pre-registrations and over 250 scientific submissions, this promises to be the largest meeting of the European Precision Agriculture community for many years. It reflects a surge in agri-tech and agronomy and provides an ideal location for your business to interact with these captive scientific and commercial precision agriculture audiences.
